

Evacuation

In the event of an evacuation, do the following:

1. First, turn off all of your equipment (hotplates, stir plates, water hoses etc...).
2. Second, follow your classmates and TA out of the lab to the assigned evacuation point.
3. Third, stay as a group and do not leave unless instructed to by the TA or the lab instructor.
4. Fourth, only re-enter the lab once you have been instructed to by the TA or the lab instructor.
